Design Contest
ME72 Engineering Design Laboratory
Fall Term, 2003
Device Scoring Test
Due: Tue, 25-Nov at 1:00 pm in M.E. Shop

1. For this milestone, you and your partner must start your devices together inside one start zone on the contest table, and must demonstrate that (together) your devices can score without an opposing team. This means you must move the cage about 1 in (2.54 cm) from its starting location.

2. Briefly describe (1-paragraph, at most) your device and how it is intended to demonstrate that it (together with your teammate’s device) can score at least one (1) point.
