Design Contest
ME72 Engineering Design Laboratory
Fall Term, 2003
Design Poster Session
Due: Tue, 21-Oct at 1:00 pm in 306 Thomas

1. Prepare a small poster (half a piece of poster board) of your em team’s design (chosen from your 3 alternatives). Please include your team’s name and number, a drawing of each teammate’s device or module, and a brief list of key design features.

2. Bring your poster along with your device mock-ups to class. Be prepared to discuss your design ideas with your classmates. Note, if you have a secret strategy you would rather not reveal at this time, go ahead and describe the general features of your design.
