1. Bring your Three Design Alternatives assignment and your Mockup.

2. Briefly describe (1-paragraph to 1-page, at most) your Mockup and how it is intended to operate.

3. Be prepared to describe your teammate’s Three Design Alternatives and Mockup.

4. Choose a team Name (in good taste) and Number (2-digit integer greater than 00).

In addition to the Three Design Alternatives and Mockup, you should bring any other mockups or prototypes you have worked on up until the PDR, even if you do not plan to pursue them for your final design. It does not matter how simple or unfinished these are, or what materials you have used (foamcore, paper, aluminum, etc.). These additional mockups will not be graded, and it will not affect your grade if you have no additional mockups. The purpose of seeing these additional mockups is to help us better understand your design process. You do not need to be prepared to describe your teammates additional mockups during the PDR.
